unique antiques

December, 1988

Dear Friend,

As 1988 draws to a close we see that it has been a good year to obtain and sell tools. Good items came into the market during the past year, and the prices realized were firm and in line with their value.

Fine English tools did advance in price as expected due to the lower dollar value in foreign markets. I've also seen scarcities begin to develop in the nice English tools, and I truly believe that we have reached the peak of available supplies. We are now heading downward as stocks of antique tools begin to dwindle. I feel good tools will be harder to find and more expensive in years to come. Again this year the sale catalog represents the largest inventory of quality tools on the market. As usual the retail prices are realistic, the quality is as represented, and the sale prices represent extra value for your money.

All items are guaranteed and may be returned within seven (7) days of receipt, for any reason, for refund of purchase price.

Please remember the tools rated "G." (good) are normal representations of their category and of the quality usually found in fine collections. All tools rated "G-" (good minus) or better are assumed usable unless specific problems are pointed out. All tools are as the craftsman laid them down, and need to be cleaned unless noted.

Thanks again for your interest, and I'll look forward to hearing from you.

Best,

32. **NANTUCKET DRIVING HAMMER**, with 1 1/2" driving face and a 4 1/2" head. The round driving face is heavily mushroomed through use and a new handle has been fitted. Needs a little bit of time to clean and add some color to the handle and this will be a good addition to any collection. G-. (88 cat. pg. 4 #5) (2222) \$ 15.00 **Sale Price \$ 10.00**

33. **POST CROZE**, 17" to 19" long and 5 1/2" to 7 1/2" wide, with nicely fitted Steel wear plates, for heavy brewery use. These crozes have fine patinas and are super primitive tools, n/c. G. (88 cat., pg. 4, #3) (3476) \$ 45.00 **Sale Price \$ 36.00**

34. **POST CROZE**, 20" long by 7" wide, Beech with 3 narrow Steel wear plates. Another extremely primitive good looking croze that has had heavy brewery use but shows it's wear well. Needs a small replacement wedge. G. (3476) \$ 45.00 **Sale Price \$ 36.00**

35. **POST CROZES**, manufactured types, medium size, 16" to 17" long by 5" to 6" wide face, nicely patined Beech. May possibly need a small wedge replacement. G. (3476) \$ 45.00 **Sale Price \$ 36.00**
5 available

36. **PAIR OF POST CROZE AND HOWELL**. These are extremely unusual due to the addition of 3 glass wear plates to the working faces of both tools. They are made out of nicely patined Beech. The Howell also has a full Brass wear plate applied to the sole. Underneath one of the glass inserts is the name "Slater" and a 1951 date on a piece of paper. This wear plate is cracked and a small triangular shaped piece is missing, but this does not detract from the overall beauty of this unusual pair of tools. I find it hard to believe that these tools would have still been in use in a brewery as late as 1951, however, I have no reason to doubt the authenticity of the date. Rare and unusual. G+. (3476/77) \$ 145.00 pr **Sale Price \$ 120.00**

37. **PLUCKERS**, Scottish. Beech, with a curved sole and two handles. Well used and showing good marks of usage, and possibly having working repairs, such as being resoled. May be marked, with fine patina. Cleaned. G. (3474) \$ 45.00 **Sale Price \$ 39.00**
4 available

38. **HEAD FLOATS**, Beech, with Brass trim and Steel wear plate on sole. Small size, 12" long with 2" iron, C/P, this working Cooper's tool shows extremely well. G. (3465) \$ 45.00 **Sale Price \$ 36.00**

(3465) \$ 45.00 **Sale Price \$ 38.00**
42. **HEAD FLOAT**, Beech, 13 3/4" long, with 3" iron, and a proper replaced wedge. This is an extremely attractive Cooper's tool having a nice wooden sole replacement years ago with a piece of Beech pegged in place. From the number of pegs showing in the top of the plane this is probably a second or third generation replacement. One of the nicest patinas on a Cooper's tool I have seen in a long time. G.
(3465) \$ 45.00 **Sale Price \$ 36.00**
43. **HEAD FLOAT**, huge, 17" long with a 5" iron. Complete with an Iron sole and top wedge braces (all heavily pitted). However the overall look of this piece is as primitive as they come, showing years of use and abuse plus still showing the dark beauty of a tiger stripe effect to the wedge. It is as clean as it's going to get and ready to show. G.
(3465) \$ 75.00 **Sale Price \$ 60.00**
44. **INSHAVES OR DOWNRIGHTS**, used for cleaning the inside of a barrel or cask. Beech with traditional gull wing style handles, convex sole, and irons. Approximately 9" long by 4" wide with 2" wide blade. C/P, ready to display. (3466)

SHIPWRIGHT

1. **SCOTCH ADZE**, with a full hammer head poll. One of the rarer forms of Shipwright's adzes:

a. "J. Agnew". A magnificent tool, with finely chamfered lines, and well taken care of. A fine full 4" bit and original handle. This tool has been used, but lightly. G+. (3138) \$ 65.00 **Sale Price \$ 58.00**

b. Another good example with a fine mark, somewhat faint "Thomas Ibbotson and Company, Sheffield", with a crescent around their clevis type mark, also bearing a fine fleur-de-lis, and a large #3 for the size. Another full 4" bit and nice chamfering, plus a good old handle with a wrapped Copper wire covering for an old handle repair. G. (3138) \$ 55.00 **Sale Price \$ 50.00**

c. A nice unmarked head with good chamfering and showing signs of early smith work, as you can see the hammer weld used for laying on the Steel bit. It has a good 4" bit and a proper replacement handle, nicely hewn and chamfered from Ash. G. (3138) \$ 55.00 **Sale Price \$ 50.00**

BRACES/DRILLS

1. **SCOTCH IRON BRACE**, with nicely turned Lignum Vitae head, and swollen Iron handle. The frame is gracefully curved and nicely chamfered. The top lever which holds the tapered bits in the socket is nicely shaped, which adds to the beauty of the piece. Pitted but clean, these braces will show extremely well. G.

(3093) \$ 50.00 **Sale Price \$ 37.50**

- 1b. **SCOTCH IRON BRACE**, (as above) but with a wing nut on the side added when the spring on the chuck wore out. G-. (3093) \$ 40.00 **Sale Price \$ 30.00**

2. **WOODEN BRACE**, Beech with nicely turned pad, 14 1/2" long, 3 1/4" throw. However, no bit pads, it would have taken a tapered pad that pinned in. Nice heavy chamfering, good lines, a little staining along the back side plus the numbers "1725" stamped one at a time 1/2" tall on the side. It might possibly be the date that the brace was made, however, I doubt that it is that early. It would make a good conversation starter though. Clean. G. (88 cat., pg. 20, #1) (2079) \$ 245.00 **Sale Price \$ 195.00**

3. **COOPER'S BRACE**, primitive and early, American. Cherry, with a 4" head and a nicely turned handle. The brace is 15" long to the end of the Iron ferrule and contains a small fixed spoon bit. This is one of the finest early Cooper's braces I have ever had the privilege of owning. The shape and form are fantastic. Fine. (88 cat., pg. 20, #2) (2039) \$ 495.00 **Sale Price \$ 450.00**

4. **PRIMITIVE WOODEN BRACE**, with a flat tongued spoon bit. 13" long to the tip of the brace, which is finished with an Iron ferrule. The brace is Beech and has a nicely turned Boxwood head, 2 3/4" in diameter. A real plain but striking brace. Clean. G. (88 cat., pg. 20, #3) (1647) \$ 295.00 **Sale Price \$ 225.00**

5. **DELICATELY SHAPED SPRING CLIP BRACE**, Beech, with one pad having an auger bit in it. A very delicate size, 11" long with a 3" sweep and nicely turned head 2 1/2" in diameter. Clean and nice. G+. (88 cat., pg. 20, #4) (2041) \$ 345.00 **Sale Price \$ 295.00**

6. **WOODEN BRACE**, Beech, 14 1/2" long, with finely turned head and extremely delicately shaped body. With a very small throw of 3 1/2", the bit pad is round and tapered plus being keyed into the bit stock at the top. Originally this bit was held in place by a thumb screw from the bottom, but that was apparently abandoned quite early. The bit pad is now held in place by a pin going through it (the pin is missing). The bit pad is fitted with an early 1/2" center bit. The brace is clean and it shows a little discoloration over the years, but has a very good patina. G. (Sup. 1, pg. 6, #2) (2041) \$ 395.00 **Sale Price \$ 315.00**

7. **UNPLATED BIT BRACE**, marked "Wm. Ash and Company". (1822-37) This brace has been misused for many years, however never allowed to wear out. It is broken in at east two places, but has been fully metal plated on both sides, plus adding another metal plate on the top of the handle. It also has been subjected to wood worm (dead) and painted many times. The existing coat of paint is a mustard brown color (old) and in fitting with the brace as a whole. One of the most fascinating waste not want not projects I have ever seen. G- (Sup. 2, pg.23, #1) (3497) \$ 75.00 **Sale Price \$ 65.00**
8. **BRACE ULTIMATUM**, "William Marples", Beech and Brass, good Ivory ring and all the proper marks, some staining to the Beech over the years and minor chips from bottom of the head. C/P. Needs a light cleaning. G. (1638) \$ 495.00 **Sale Price \$420.00**
